Please, use the **EN version** (instead of the Google translation)

Login to the site if you would like to see every menu.

Syllabi: You can find the schedules of your courses.

Consulting hours: You can meet your teachers during the consulting hours. Here you can find the list.

Phonebook:
Teachers' contact data

The screenshot shows the website of the University of Debrecen Faculty of Informatics. The browser address bar displays `inf.unideb.hu/en/dr-gyongyi-bujdoso?check_logged_in=1`. The top navigation bar includes a 'Phonebook' link, a language selector set to 'bujdoso', and a language toggle for 'EN'. The main header features the university logo and the text 'University of Debrecen Faculty of Informatics'. A secondary navigation bar lists 'OUR FACULTY', 'EDUCATION', 'R&D', 'EVENTS', and 'CONTACT', with 'STUDENTS' highlighted under 'EDUCATION'. The main content area is divided into several sections: 'FACULTY APPLICATIONS', 'INTERSHIPS OFFERS', 'JOB ADVERTISEMENTS', 'DOCUMENTS', and 'USEFUL LINKS' on the left; 'IMPORTANT DATES' (with 'Consulting hours' highlighted) in the center; 'DEGREE MAJORS' (listing various programs) on the right; and 'INFORMATION' and 'DOCUMENTS' on the far right. A 'Syllabi' link is highlighted in the bottom right corner.

Buildings on the Kassai Campus

Example 1:

TEOKJ 2. em 107 or
TEOKJ-2/107

is the classroom no. 107
on the 2nd floor of the
TEOK building

Example 2:

IK-107

is the classroom no. 107
on the 1st floor of the
IK building

About the course

Requirements

Participation in seminars is a condition for obtaining a signature.

More than 3 absences will result in a refusal to sign the (practice) course.

Quizzes

During the classes of this course, 4 short quizzes are held, the duration of which is 20-25 minutes.

About the course

Grades – Quiz Results

The results of the short quizzes does not effect the practice course's signature.

A result below 85% does not affect the exam grade.

A result above 85%, additional percentage points can be obtained, which are displayed as additional points on the exam. Those extra percentage points will be added to the results of the exams organized in the current semester's exam period.

After every five percentage points achieved above 85% in the short quizzes, one extra percentage point will be awarded, i.e.,

- 1 extra percentage point from 85%,
- 2 from 90%,
- 3 from 95% and
- 4 for 100%.

This means that a maximum of $4 \times 4 = 16$ additional percentage points can be accumulated during the seminar period for helping a better exam grade.

Schedule

- Class 1: Basic concepts of set theory. Relations and functions.
- Class 2: Sample logical languages
- Class 3: The language of propositional logic, the basic element of syntax: (immediate) subformula, construction tree.
- Class 4: Concepts of semantics: interpretation, truth valuation in interpretations. Satisfiability and validity. Equivalent formulas.
- Class 5: **Short quiz 1** and after that: Consequences in propositional logic. Natural language reasoning.
- Class 6: Bracket elimination, conjunctive and disjunctive normal forms.
- Professional Week (get a possibility for a 5th quiz)
- Class 7: **Short quiz 2** and after that: Sequent calculus in propositional logic I.
- Class 8: Sequent calculus in propositional logic II.
- Class 9: **Short quiz 3** and after that: First-order logic: syntax.
- Class 10: First-order logic: semantics.
- Class 11: **Short quiz 4** and after that: Consequences in predicate logic, syllogism.
- Class 12: Construction prenex forms.
- Class 13: Summarization, outlook. Closing
